

---

# Are you an **undergraduate student** interested in **research** on **children & technology**?

---

The Cognitive and Developmental Science (CoDeS) Lab is  
looking for new undergraduate team members  
with curiosity, grit, and empathy!

**CoDeS Lab**  
**Cognitive Developmental Science**  
**Lab**

**Who we are?** In the CoDeS Lab, we conduct developmental research to understand children's learning from technology. By becoming members of the Cognitive and Developmental Science Lab, undergraduate students will engage in every aspect of developmental research.

**What we do?** Research activities include conducting literature reviews, recruiting subjects, designing stimuli for experimental research, collecting data (e.g., observing children at preschools or labs), entering data, coding audio/video recordings (e.g., children's eye movements, task performance), cleaning and analyzing data, presenting results in various formats, and more!

**How to apply?** If you are an undergraduate student interested in our research or looking for research experience, please fill out the undergraduate research assistant application form available on our lab website: <http://kchoi.org/openings/>

**Questions?** Please do not hesitate to direct your questions to Professor Choi at [koeun@vt.edu](mailto:koeun@vt.edu) or Graduate Research Assistant, Lucy Shin at [shinek@vt.edu](mailto:shinek@vt.edu)
